

How Many WP Blogs On A Network Confirmation ?

Posted by WebSolutions 4 All.co.uk - 2010/10/16 16:56

Hello Carty,

You mention on the page link below, to only have between 5 - 7 sub-domains on a WP blog and the same on a Blogger blog ...

<http://www.webmagnates.org/bloggging/how-to-make-money-from-automated-blogs.html>

So if I am setting up a network on a domain name, are you saying I shouldn't go over 7 at most ?

I just thought having a network of blogs could be on one domain name and you could have 50 or more ...

Can you carify this please ?

Jane

5 limit is for Blogger. I recommend 5 sub-domains for wordpress if you plan to have them all under related niches. Else go more.

Sorry Carty, I'm still not quite with it on this one - do you mean to have just 5 blogs within 1 Blogger account ?

And as for WP blogs, do you mean to keep all 5 sub-domains related ?

As I'm open to anything at the moment with want2buyit.com - are you saying, what I pick will all need to be related in some form or another as sub-domains on this domain ?

Just you mentioned having a network and I presumed a network would consist of many more - can you enlarge on this please ?

What would happen if I chose different subjects for my sub-domains on want2buyit.com - i.e. electronics, beauty products etc ...

Yes, 5 blogs per blogger account.

It is better to keep the sub-domains related to one broad niche but not a problem if you want to have multiple niches.

The reason I keep them closely related is because I can suggest my visitors to check out the sub-domains in the same domain and they will all be related to their interests right..

Regards,
Carty..
