

Hello

The website for this feed (<http://www.thekitchn.com/thekitchn/atom.xml>) gave me a message saying that it was not accessible and if I wanted to report it.

Now do I stay away from this site and look into another? :unsure:

I have had the same troubles but I just move on.
Could be it will work another time...

I tried adding it here and it went through fine. The feed URL is actually redirected to <http://feeds.feedburner.com/apartmenttherapy/thekitchn> so try adding this and tell me if it works.

Carty..
