***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the

jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging enabled.

For example:

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Looks like your blog name has some special characters which are not supported. Can you please try changing the blog name to something without any special characters and tell me if it works fine.

Regards,
Carty..

Carty,

I dont understand... there are no special characters in my blog name. At least, I wrote only in English and nothing else.

Please let me know what else I can do.

Thanks,
Alex

Say you enter the username and password to your blogger account and press "get blogs" button. You get the list of blogs in your account in the drop-down. Can you tell me the name of the blog shown in the drop-down?

Regards,
Carty..

Yes, please tell me the name of the blog that you're selecting in the drop-down or what name is listed there in the drop-down.

Regards,
Carty..

Guys,

Those of you who are unable to solve this problem,

What I realized was that you cannot have any other characters except English letters

so those !?>
