

## Nothing Happening

Posted by Russ - 2010/09/24 18:06

---

Hi Carty, I just installed and linked it to a blog on my own domain to test it out. Found an RSS feed and told it to Post to Blog but Nothing much seems to be happening.. Easier to make a video to show you so I did:

<http://smarterforextraders.com/problem>

Hope you can help me out.. or maybe I'm just thick B)

cheers

Russ

Russ, try disabling a few third party plug-ins temporarily and make the post to see if they go through fine.

Regards,

Carty..

Hi Carty,

I disabled ALL the plugins on the blog using "bulk actions" then tried to post just One feed again exactly as in the video above - it's been 30 minutes now and it still says "Uploading Images"

I also retested the connection and that all seems fine but basically it's doing nothing.. :(

Russ, please email me: Support CartyStudios.com with your version details shown on the Splash screen when you open the software. I will check into it then.

Regards,

Carty..
