

Auto Blog Samurai Deleting Specific Feeds

Posted by JohnT - 2010/09/30 17:54

I have tried to delete specific feed items; but it does not work. I click on the ime and right click for delete selected. Nothing happens. Any suggestions? Or what am I doing incorrectly?

Thanks.

Yes, I'm having the same problem and would appreciate a fix...

Hi,
I found that "right click delete" doesn't work, but using delete button on keyboard does for some reason.

Really? Tries the keyboard delete button and it did nothing. What did you do?
