

## Urgent Help - Carty Reply ASAP

Posted by Dexter - 2010/10/17 06:55

---

Karthick, ive been using this ABS for a month now, it is good going. But the Problem im facing is, after extracting the feeds, the content shows only single line break after each paragraph.

example.

```
"asdf  
asdf
```

```
asdf"
```

But after Posting it to the blog it shows 2 line breaks, which makes the post look weird :( like this,

```
"asdf  
asdf
```

```
asdf"
```

Can you Help me in resolving this problem..... because this can make someone think the posts are auto-posted, so manually do all the things by logging into wp-admin... little frustrating as i got less time for spending in blogs!

Regards,  
Raj

I think some feeds still use the old school double breaks. I will try auto replacing them with

tags in my next versions.

Regards,  
Carty..
