

@Carty- Feedburner RSS Feed Extraction - No Images

Posted by virtualvice - 2010/12/14 01:04

I'm not able to get ABS to extract images from Feedburner formatted RSS feeds. Is this a known issue? Is there a workaround? Have tried four different Feedburner feeds with same problem on all. Here is a sample feed format:

<http://feeds.feedburner.com/domainName/>
