

YOUTUBE DOING MY HEAD IN

Posted by mattseo - 2010/12/21 15:01

HI

When using youtube rss I keep getting the video titles down fine and in the content box below.....

Welcome to YouTube!

Suggested Language (we have set your preference to this): English (UK)

Suggested Location Filter (we have set your preference to this): United Kingdom

The location filter shows you popular videos from the selected country or region on lists like Most Viewed and in search results. If you would like to change either of these preferences, please use the links in the footer at the bottom of the page.

Click "OK" to accept these settings or click "Cancel" to set your language preference to "English (UK)" and your location filter to "Worldwide".

YouTube RSS Feeds are not supported in this version. However, YouTube videos published on other blogs can be extracted. I do have plans to include direct YouTube feed extraction in future versions.

Regards,
Carty..

Thank god I found this post I have been trying to do the same and obviously getting the same results, it would be great to get direct YouTube feed extraction at some point.

cheers
