

## Cash link issue

Posted by cincystevenson - 2011/02/04 13:38

---

Carty,

I am new to blogging and just purchased ABS. I think I got a good idea of how to use the software except with one issue with the cash links.

I can't get them to work. I input the keyword(s) and then my links just like the tutorial says to do then. I just hit the red X button to close the cash links pop up screen. What am I doing wrong? I don't know if this matters but I am using only blogger blogs. Any help will be greatly appreciated.

Thanks!!

the cash links have to be put in the system before the feed is drawn to the software is what has worked for me before. if the content is pulled before you import your cash links the software doesn't amend what is already downloaded... same for translation, the software spins it before it gets to you so you can review and edit if needed. hope that helps.

Thanks right. The cash links are applied only when the feeds are being downloaded.

Regards,  
Carty..
