

Amazon Images

Posted by zombiemich - 2011/03/12 02:12

This is very annoying. Why do the images from amazon never post. Everytime I pull a feed from Amazon I have to go in and fix it manually.

Can you give me a link to one of your post where the image was not uploaded..

Regards,
Carty..

You're using Blogger which does not allow direct upload of images. You need to specify an FTP server login details so the software can upload the images there and link them to your posts automatically.

Regards,
Carty..

woops, okay. glad I found this thread. Was just about to open one on this issue.

Anyway, so i'm guessing no problem extracting Amazon images on self hosted wordpress. But still a pain to link images manually to blogspot.
