

## Unable to schedule plr articles on blogger?

Posted by vnp007 - 2010/05/19 10:46

---

Hi Carty,

I have purchased your software a few weeks ago. I have found that there is a problem with ABS while importing my PLR articles. since it shows that "all the marked items are posted" and "Finished Posting" dialogs, but actually when I log into my blogger account and inquire for the SCHEDULED or DRAFT posts, it doesn't show anything. So, I would like to ask you, Where am I going wrong? What necessary changes are required in my blogger settings? What might be the problem? Please provide your help to get me out of this situation.

Hope to hear from you soon.

Thanks for the Great Software in the World of Autoblogging.

Regards.....

Thank you again for your purchase. Please create an empty text file named 'ErrLog' in the Installation folder of the software (C:\Program Files\CartyStudios Corp.WebMag..) and then open the software, make some posts. Check this file to see if it has logged any error message and email it to me: Owner CartyStudios.com

I could then help you better :)

Regards,

Carty..

I am having the same trouble. I have done as you have asked the other person. Nothing is in the ErrLog file. it is simply empty. Please let me know what I must do to get the software posting to my blog. Thank you in advance.

PunditGonzo, does the normal RSS feed post go through fine to your blog? You're trying with

---

WordPress or Blogger.com?

Regards,  
Carty..
