

## Article Submitter Plus Version1.1.1 Update Info

Posted by Carty - 2013/02/21 09:16

---

Hello Guys,

The software Article Submitter Plus will be updated to version 1.1.1 today.

The main feature of this update will be a refresh in the Master list. Initially when we launched the software couple of months back, we released with 400 sites. Then the list grew upto 3000+

As most of the sites (99%) are third party sites, many went out of maintenance and stopped working so the submission rate dropped down. We have now compiled a new list of 1500 sites and included in the master list.

After applying the update, please open the software' install folder which is usually like  
C:\Users\YOUR-USER-NAME\AppData\Roaming\Article Submitter Plus

and paste the attached file MasterList.txt replacing the old one there. You could take a backup of the file before replacing if you wish to.

Finally, open the software, add a new profile to begin using the new list. If you have any questions, please reply below and we will be more than happy to help.

Regards,

Carty.. <http://webmagnates.org/images/fbfiles/files/MasterList.txt>

Hi Nick,

Can you direct me to where I can learn how to copy and paste my content into the software. I'm having trouble using the basic function of copying and pasting my articles into the software. Please inform asap!  
Thanks in Advance

-Wendhel

Dear Wendhel,

You can paste using the key Ctrl + V. Try it and tell me.

Regards,  
Carty..
